Journal of Membrane Science 98 (1995) 300–301

journal of MEMBRANE SCIENCE

Subject Index

Affinity membranes, 275
Alumina, 143
Amberlite, 77
Anion-exchange membrane, 177
Anodic alumina, 131, 143

Barrier membranes, 27
Batteries, 77
Borate ion, 177
Bovine serum albumin, 119

Carbon dioxide, 69
Carrier-relay mechanism, 177
Catalytic transport, 183
Ceramic membranes, 131, 143
Charge repulsion, 249
Chitosan, 223
Coagulant, 233
Coagulation value, 233
Coarsening, 209
Compressibility, 107
Concentration polarization, 49
Conducting polymer membranes, 173
Constant volume system, 281
Continuous membrane column, 57
Cross-flow microfiltration, 97, 263

Daramic, 77
Demixing, 191
Dialysis / including Donnan, 13
Diffusion, 69, 223
Dual membrane cell, 173
Dynamic modeling, 263

Electrochemically controlled transport, 173
ESR of polymers, 201
Ethanol, 1
Extraction, 1

Facilitated transport, 157, 177
Fermentation, 1
Fiber membranes, 49
Fiber size distribution, 49
Filtration, 119
Fouling, 249
Fouling mechanism, 107

Gas adsorption, 191
Gas membranes, 1
Gas separations, 57, 157, 281, 287
Gravitational effects, 27

Hydrophobic membranes, 1

In situ complexation, 183
Ion exchange, 77
IR spectroscopy of anodic alumina, 131

Liquid membranes, 157

Mass ratio of nonsolvent-additive to solvent, 233
Membrane casting solution, 233
Membrane formation, 191
Membrane fouling, 263
Membrane preparation and structure, 27, 131, 209
Microporous and porous membranes, 27, 209, 275
Modules, 49, 57
Moment analysis, 97
Morphology, 191

Nanofiltration membranes, 249
Nernst–Planck equations, 13
Neural networks, 263
Neutralization reaction, 13

Oxide, 119

Permeability, 69
Permeate flux, 97
Pervaporation, 89, 183, 223
Phosphonic acids, 119
Phosphoric acid, 119
Plasma graft-polymerization membrane, 89
Polyamide membranes, 281
Polyphenylene oxides membranes, 287
Polysulfone, 191
Polysulfone membrane, 69
Poly(vinylidene fluoride), 89
Porosity, 107
Precipitation value, 233
Pressure–permeability dependence, 287
Propylene, 287
Pulp and paper effluent, 249

Quasi-steady state, 97

Raman spectroscopy of polymers, 201

1995 Elsevier Science B.V.
*SSDI*0376-7388

Raw cane sugar, 263
Redox cells, 77
Retentate recycle, 57
Retention, 249

Sodium salt form of sulfonated membrane, 89
Solubility, 143
Sorption and dilation, 69
Stagnant cake layer, 107
Sugar, 177
Sulfonated polystyrene, 89
Supported liquid membrane, 241
Surface modification, 119
Swelling, 287
Symmetric and asymmetric membranes, 201
Synthetic membranes, 201

Temperature, 223
Theory, 13, 27, 49
Thermally induced phase separation, 209
Thermotreatment of anodic alumina, 131
Thickness, 223
Transport of vanadium(V), 241
Tricaprylylmethylammonium chloride (Aliquat 336®), 241
Two-step temperature jump, 209

Unstirred layer, 13

Vanadium, 77

Water sorption and diffusion, 27
